

IFU

Description of Related Art continued:

While all of the aforementioned prior art constructions are more than adequate for the basic purpose and function for which they have been specifically designed, they are uniformly deficient with respect to their failure to provide a simple, efficient and practical toilet that effectively conserves water. My "FLUSH VALVE ADAPTER" will correct all of these deficiencies. As a consequence of the foregoing situation, there has existed a longstanding need for a new and improved "DUAL FLUSH TOILET ADAPTER" and the provision of such a construction is a stated objective of the present invention.
